---

## PROJECTS

### 2D Adventure Game

- Developed a 2D adventure game using Java in NetBeans where players can navigate through multiple maps.
- Implemented player movement controls and map transitions to create an interactive gaming experience.
- Focused on basic game mechanics and smooth user interaction.

### Tour Management System

- Built a full-stack tour booking application where users can browse and book tours.
- Integrated a payment gateway for secure transactions and implemented features like discount coupons to enhance user experience.
- Used Express.js for backend API development and MongoDB for data storage.

---

## CERTIFICATES

### Programming in python

- Mastered fundamental Python syntax, potentially utilizing control flow, loops, functions, and data structure.
- Acquired expertise in procedural programming paradigms and associated logical concepts, enhancing capabilities.

### Introduction to Data Analytics (IBM)

- Learned about the data ecosystem, including the ETL process and big data basics.
- Mastered data gathering, identification, and cleaning for analysis preparation.
